

Epstein Flight Network Visualization

Interactive visualization of Jeffrey Epstein's flight records and co-travel network.

Data Setup

The datasets are not included in this repository.

Before running the project:

1. Download the datasets from Google Drive:
[Download datasets](#)
2. Download both folders:
 - `data/`
 - `images_persons/`
3. Extract them
4. Place them at the root of the project so the structure looks like this:

Epstein-Flight-Explorer/

```
|— data/  
|— images_persons/  
|— index.html  
|— js/  
|— css/
```

Quick Start

```
# Start server  
python3 -m http.server 8000  
  
# Open in browser  
http://localhost:8000
```

Project Structure

```
Epstein-Flight-Explorer/  
|— index.html          # Main visualization  
|— js/                 # JavaScript modules  
|   |— main.js  
|   |— map.js  
|   |— chord.js  
|   |— data.js
```

```

```

Data Files

File	Description
<code>flights.csv</code>	Flight records (date, origin, destination, passengers)
<code>persons.csv</code>	Person data
<code>persons_enriched.csv</code>	Enriched data with categories, bios, photos
<code>cities.json</code>	City/airport geolocation
<code>world.geojson</code>	World map boundaries
<code>ryanlerch-Airplane-Roadsign-2.svg</code>	Plane SVG icon used in the visualization
